

A LITTLE ABOUT US

In the early 2000's, if you and your pet ventured to the local park, more than likely you would have found a few paved or well-groomed trails. Perhaps even, a large field where leashed pets could enjoy. Fast forward a few years, and dog specific parks began to emerge. These dog parks were large open fields, likely fenced, where dogs could run free. This was 2009. Picnic tables and a simple watering spigot were the amenities of the day. A decade has gone by since then and dog parks have evolved immensely. By today's standards, dog parks are rather extravagant. Today, dog parks are multi-faceted recreational experiences for dogs and dog owners alike. Exercise equipment, dog specific drinking fountains, groomed dog trails, and warming/cooling stations are the norm. Dog parks are now an integral aspect in communities and municipalities throughout the United States. Drawing on the energy and momentum of the last decade, Dog Wash Systems, USA is excited to partner with the park and recreation industry. A dog park amenity such as a self-serve pet wash, not only provides value to the communities they serve, but can quickly become an asset to the budget line. A wide variety of self-serve pet wash styles are available to serve your recreation project. Let Dog Wash Systems, USA partner with you to help you do what you do best—serve your community!

WHAT IS A DOG WASH SYSTEMS VENDING STATION?

Dog Wash Systems manufactures modular stations; self-contained, fully functional pet wash buildings offering self-serve dog grooming and washing solutions conveniently and of course, comfortably. Classified as a vending machine, our units have a low impact on the environment and have the capability to have a high impact on your revenue.

Imagine a place where you could go with your dog, wash and groom him or her without having to wrestle them into a tub or chase them around the living room sofa while dripping wet. This is every dog owner's dream and a reality with self-serve dog washing stations. A DWS Model is an aluminum or stainless steel unit with walls, a sprayer, soaps, informational signage and custom graphics to suit your needs.

Pet Washing Stations

PROVIDING A NEEDED SERVICE WHILE EARNING INCOME

WHERE TO INSTALL A SELF-SERVE PET WASH?

A pet wash can be placed virtually anywhere there are people and pets. To get the most out of your pet washing facility and equipment, it's recommended that the pet wash be placed in a highly populated residential area and be operated 24 hours / 7 days a week. Not everyone will use a dog wash building on the weekends. Plenty of animal lovers seek washing facilities after hours, early in the morning and even in the middle of the night. By providing this service anytime, you increase the probability that more people will use your pet wash system. Self-serve pet washes partner well with:

- Camping and RV Parks
- Car Washes
- Gas/Service Stations
- Convenient Stores
- Laundromats
- Pet Stores
- Auto Lube/Oil Change Shops
- Dog Parks
- Kennels
- Apartment Communities
- Pet-Friendly Hotels
- Veterinarian Offices/Hospitals
- Beaches
- Many more!

CUSTOMIAZTION

COLORS, DECALS, LAYOUT & MORE

CARD SWIPERS

VENDING MACHINE & TREATS

Part of what makes our Dog Wash Systems units so unique is the ability to customize your self serve pet wash unit free of charge. Choose a color, send us your logo and we'll help you create your one-of-a-kind pet wash to match your existing business's branding.

HOW DOES IT WORK?

It's simple! Once you have decided that you're purchasing a unit, Dog Wash Systems requires a 30% down payment and render approval before commencement of your build. After we receive your down payment, one of our graphic designers will reach out to you via email or by phone. We will request some basic information from you such as unit color preference (does not apply to Stainless Steel models), logos, URL's, etc. After we have all the information we need, our designers will whip up a rendering of your unit and email it to you. If you have a problem or question about the rendering, want something added / omitted, just let the designer know and we'll send another rendering. After we get verbal or written approval from you, building of your unit will commence! Depending on our work load at our Garden Prairie facility, DWS Models will take 4-6 weeks to build and Modular Station units will take 6-8 weeks.

PRODUCTS

DOG WASHING SYSTEMS AND MORE

DWS Model

Our stand alone tub model. This unit is generally programmed to generate revenue, however they can also be programmed to operate as a free amenity unit. Owners can set their own rates or use our standard and recommended \$10 for 12 minutes configuration. These units are completely customizable and are available in aluminum and stainless steel.

Modular Station

Our Modular Stations offer all of the convenience of our DWS Models with the addition of a fully enclosed bay. These buildings are fully air conditioned for the summer months and heated for those cold winter months. Our buildings also feature a vacuum for sucking up all of the excess water left on your pet after a wash. Modular stations come in two sizes; **Single (8' x 13')**, and **Double (8' x 21')**.

Awnings

Built to the same high standards as our aluminum powder coated units, these awnings offer protection from the elements while washing your pet. Our awnings make a great addition to any DWS unit and they can be powder coated to match your unit. Alternately, choose another color to add some contrast and make your unit pop.

As always, be sure to check out our website for more information!
